

YUGEN AGARWAL

Full-Stack Software Engineer | Building AI-Powered Applications

Surat, Gujarat, India

+91-8160508314 | yugagarwal214@gmail.com | github.com/yugagarwal10 | linkedin.com/in/yug-agarwal-50019a291

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable web applications, backend systems, and AI-powered automation tools using React.js, Node.js, TypeScript, MongoDB, Redis, Docker, and AWS. Experienced in designing production-ready APIs, optimizing system performance, integrating AI capabilities into applications, and deploying scalable software. Currently building AI automation tools while expanding expertise in Python, PostgreSQL, Docker deployments, and cloud-native software development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, Redux, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, BullMQ, JWT Authentication, Google OAuth, WebSockets

Databases & Tools: MongoDB, Redis, Git, GitHub, Postman, PostgreSQL, Figma, VS Code

AI: LLM Integration, Prompt Engineering, AI Workflow Automation, Agentic AI

Cloud & Deployment: AWS, Docker, GitHub Actions, Nginx, PM2, Monitoring

Integrations: Razorpay, Shiprocket, Email Services

Core Concepts: Data Structures, Object-Oriented Programming (OOP), DBMS, Networking, SDLC, System Design

PROFESSIONAL EXPERIENCE

IT Futurz

Software Engineer

Dec 2025 – Present

Surat, India

- Developed scalable backend services, AI-assisted automation workflows, and production-ready APIs for business applications.
- Designed scalable backend services and AI-assisted workflows, reducing manual coordination efforts by nearly 40% while improving application response times by approximately 35% through Redis caching and API optimization.
- Contributed to platforms such as GBS and Travel Nexus focused on referrals, networking, collaboration workflows, and scalable business operations.
- Managed production deployments, monitoring, debugging, and server-side issue resolution for live applications serving hundreds of users.

Elaunch Infotech Solutions

Software Developer

May 2024 – Dec 2025

Surat, India

- Built a full-scale ERP platform integrating attendance, payroll, task tracking, and document workflows to streamline business operations.
- Boosted operational efficiency across multiple departments by nearly 30% through workflow automation.
- Optimized backend performance through query restructuring, API improvements, and scalable service architecture.
- Handled deployment workflows, production debugging, and server-side issue resolution across staging and live environments.

Rich Promotions

Software Developer (Part-Time)

May 2023 – May 2024

Surat, India

- Developed and maintained responsive company websites, enhancing page load performance and overall user experience.
- Optimized website SEO and frontend performance, improving page load speed by 30% and increasing user engagement across company websites.

PROJECTS

Currently Building: AI Content Automation Assistant | Python, Telegram Bot API, LLM APIs

- Building an AI-powered content automation assistant that generates professional LinkedIn posts, articles, and personalized content using Large Language Model (LLM) APIs.
- Developing a Telegram-based interface to generate, review, and manage AI-generated content before publishing.
- Implementing prompt engineering techniques and context-aware workflows to create personalized, high-quality content while reducing manual effort.
- Currently expanding the platform with LinkedIn profile analysis, browser automation, personalized outreach generation, and AI-assisted networking workflows.

Nexus ERP Solution | React.js, Node.js, MongoDB, Redis

- Built an enterprise ERP platform managing payroll, attendance, task tracking, and document workflows for business operations.
- Automated operational workflows and enhanced internal visibility for teams and management processes.
- Managed backend architecture, deployments, monitoring, debugging, and production optimization for live environments.

Chandrama by Ruchi | MERN Stack, Razorpay, Shiprocket

- Built and deployed a complete e-commerce platform with Google Authentication, Razorpay integration, Shiprocket automation, and admin dashboards.
- Refined backend API performance and caching strategies to enable faster order-processing workflows.
- Integrated secure payment and logistics systems to streamline order management and delivery operations.

ZZUP - EV Ride Booking Platform | *React.js, Node.js, MongoDB, WebSockets*

- Developed an EV ride-booking platform with real-time booking workflows and live driver-tracking systems.
- Implemented booking management, dispatch coordination, and trip-tracking workflows for smoother operations.
- Built scalable backend services capable of efficiently handling concurrent booking and ride-management requests.

EDUCATION

SD Jain International College
Bachelor of Computer Applications (BCA)
Agarwal Vidya Vihar
Higher Secondary Education (HSC)

Surat, Gujarat
